SUMMARY of CHANGE

DA PAM 350–39
Standards in Weapons Training (Special Operations Forces)

This revision--

- Deletes requirements for M72A2 light antitank weapon (LAW) (Chap 2).
- Deletes requirements for ranger antiarmor-antipersonnel weapon system (RAAWS) (Chap 2).
- Deletes requirements for Stinger crews (Chap 2).
- Deletes requirements for mine warfare (Chap 2).
- Deletes requirements for MGXX warfare (Chap 2).
- Deletes requirements for CAR15 warfare (Chap 2).
- Deletes requirements for Combat Training Center (CTC) (Chap 2).
- Adds requirements for rocket propelled grenades (RPG) (Chap 3).
- Adds requirements for close-quarters combat (CQC) (Chap 3).
- Adds requirements for recoilless rifles (RCRL) 84-mm and 90-mm (Chap 3).
- Adds requirements for Stinger crews (Chap 3).
- Adds requirements for mortars 107-mm (Chap 3).

Training

Standards in Weapons Training (Special Operations Forces)

By Order of the Secretary of the Army:

DENNIS J. REIMER
General, United States Army
Chief of Staff

Official:

JOEL B. HUDSON
Administrative Assistant to the Secretary of the Army

History. This is a revision of the publication printed on 30 September 1993. Because the publication has been extensively revised, the changed portions have not been highlighted.

Summary. This revised pamphlet contains procedures for planning, resourcing, and executing training. It includes weapons qualification standards, suggested training programs, and ammunition requirements for the attainment and sustainment of weapons proficiency. The programs incorporate training devices and simulators.

Applicability. This pamphlet applies to the Special Operation Forces Deputy Chief of Staff for Operations and Plans in the Active Army, the Army National Guard, and the U. S. Army Reserve . This publication is applicable to all Special Operation Forces unit commanders, battalions, groups and major Army commands. This publication applies during partial and full mobilization.

Proponent and exception authority. The proponent of this pamphlet is the Deputy Chief of Staff for Operations and Plans. The Deputy Chief of Staff for Operations and Plans has the authority to approve exceptions to this pamphlet that are consistent with controlling law and regulation. The Deputy Chief of Staff for Operations and Plans may delegate this authority, in writing, to a division chief within the proponent agency or a field operating agency in the grade of colonel or the civilian equivalent.

Suggested Improvements. Users are invited to send comments and suggested improvements on DA Form 2028 (Recommended Changes to Publications and Blank Forms) directly to Deputy Chief of Staff for Operations and Plans ATTN DAMO-TRO 400 Army Pentagon Washington DC 20310-0450.

Distribution. Distribution of this publication is made in accordance with initial distribution number (IDN) 094360, intended for command levels B, C, D, and E for the Active Army, A, B, C, D, and E for the Army National Guard, and the U.S. Army Reserve.

Contents (Listed by paragraph and page number)

Chapter 1
Introduction, *page 1*
Purpose • 1–1, *page 1*
References • 1–2, *page 1*
Explanation of abbreviations • 1–3, *page 1*
The Standards in Training Commission • 1–4, *page 1*
Management • 1–5, *page 1*

Glossary

Index

Chapter 1
Introduction

1–1. Purpose

a. This pamphlet provides Department of the Army (DA) requirements for weapon training programs as stated in AR 350-41, Army Forces Training. This pamphlet applies to weapons and weapon systems used throughout U.S. Army Special Operations Command (USASOC) for both Active and Reserve components. The following training programs are included in this pamphlet—

- Gunnery training programs consisting of standards for qualification.
- Suggested training strategies for individual and crew-served weapon systems to achieve those standards.
- Ammunition requirements to execute the training strategies.

b. The Army training goal is a combat-ready force prepared to deploy on short notice and to fight and defeat enemies. To help achieve that goal, this pamphlet:

(1) Provides commanders and other unit trainers with a common set of weapon and weapon system qualification standards.

(2) Provides commanders and other unit trainers with suggested weapon training strategies that will lead to the attainment and sustainment of standards and provide a model of resource allocation.

(3) Provides commanders with measurable standards for evaluating a portion of their overall training readiness.

1–2. References

Required and related references are listed in Appendix A.

1–3. Explanation of abbreviations

Abbreviations used in this pamphlet are explained in the Glossary.

1–4. The Standards in Training Commission

In March 1982, the Vice Chief of Staff, Army (VCSA) established the Standards in Training Commission (STRAC), appointing a chairman and U.S. Army Training and Doctrine Command (TRADOC) U.S. Army Training Support Center (ATSC) as the Army Executive Agent. The mission was to determine the quantities and type of munitions essential for soldiers, crews, and units to attain and sustain weapon proficiency relative to readiness levels making maximum use of aids, devices, simulators, simulations and subcaliber firing.

1–5. Management

The STRAC chairman directs the program, and reports directly to the VCSA. The chairman is supported by a general officer steering committee with membership from the Army Staff Active Component (AC) and Reserve Component (RC), major Army commands (MACOM), TRADOC and the commandants of the ordinance delivering schools. The executive committee reviews the program and provides recommendations to the chairman. The weapon committees chaired by the commandants of the TRADOC proponent schools, with full MACOM representation, develop weapon training standards and strategies for staffing and approval by HQDA.

1–6. Training functions

a. The Assistant Secretary of the Army (Research Development and Acquisition) manages the research, development, and procurement of ammunition items.

b. The Deputy Chief of Staff for Operations and Plans (DA-DCSOPS)—

(1) Trains Army Forces and chairs the STRAC.

(2) Advises the Chief of Staff, Army and Vice Chief of Staff, Army on STRAC matters.

c. The Director of Training, Office of the DCSOPS (HQDA, DAMO-TR)—

(1) Acts on behalf of the DCSOPS as the Headquarters, Department of the Army (HQDA) point of contact for standard training programs and chairs the STRAC General Officer Working Group.

(2) Prescribes policy, coordinates standards in training requirements and develops training ammunition requirements.

(3) Prescribes criteria for, and designates units at, training levels.

(4) Monitors STRAC training programs.

(5) Resources the Army component of Combat Training Centers with ammunition, separately from units.

d. The Deputy Chief of Staff for Logistics manages transportation and storage of ammunition required to support the training programs.

e. The Commanding General, U.S. Army Training and Doctrine Command (CG, TRADOC)—

(1) Develops, standardizes and evaluates standards and training strategies.

(2) Staffs weapon training strategies through the STRAC General Officer Working Group for publication.

(3) Implements standards in training programs in the training base, where applicable.

(4) Determines annual training ammunition requirements for the training base according to standard training programs.

f. Commander of U.S. Army Special Operations Command (USASOC)—

(1) Trains forces to attain and sustain weapon proficiency standards.

(2) Determines annual training ammunition requirements and authorizations for assigned units considering standards and notional (ideal) strategies in this pamphlet, unit mission, unit priority and applicable resource guidance.

g. Commanders examine each strategy as it applies to the unit's training level, unique training needs, overall training program and objectives, as specified by mission, soldiers manual (SM), and Army Training and Evaluation Program (ARTEP).

1–7. Weapon system training programs

a. Weapons and weapon systems for which training programs have been written and approved are identified in tables 1-1 through 1-4.

b. Chapters 2 and 3 contain strategies for training and maintaining proficiency for soldiers, crews, and units in gunnery skills for Rangers and Special Forces respectively. Chapter 4 includes weapon/crew qualification requirements for the 160th Special Operations Aviation Regiment (AC) and the 1/245th Special Operations Aviation Battalion. Chapter 5 provides standards, strategies, and ammunition resources for Civil Affairs and Psychological Operations units (AC and RC). Chapter 6 covers mobilization of these units.

c. The standards listed throughout each chapter are prescriptive. The strategies provide a model for training and resourcing to attain the standards. The strategies listed are one way of meeting the standards. Commanders must examine each strategy as it applies to the unit's training level, unique training needs, overall training program and objectives as specified by mission, SM, and ARTEP. Commanders must make this determination prior to expenditure of full service ammunition, which is fixed and based on the notional strategies, thus allowing ammunition to be used more effectively on those tasks in which the unit is deficient. Flexibility in the strategies is intended to accommodate unit requirements.

d. Reference to training readiness conditions (TRC) are omitted from this revision, as redundant to table configuration.

e. Combat Training Center rotations are resourced at the CTC in question: National Training Center (NTC), and Joint Readiness Training Center (JRTC). The ammunition package for each organization is identified here for unit information.

1–8. Training devices

Training devices aid sustainment training in garrison and local training areas. Devices will enhance and sustain skills and, in some cases, may be the sole medium for training critical tasks. Devices

are an integral part of the training strategies and full caliber requirements are based on their use as presented in the strategies. A complete list and description of available devices may be found in DA Pam 350-38 in the appropriate weapon system chapter.

Chapter 2
Rangers

Section I
Training Programs

2–1. General

This chapter provides weapon standards, training strategies and resource requirements for the 75th Ranger Regiment. The training programs provided are specifically designed for each weapon system within Ranger units. Each program contains a standard and strategy that outlines the training requirements and includes suggested frequencies of live fire, subcaliber, and use of devices.

2–2. Objective

The objective is to assist Ranger commanders in conducting the training necessary to ensure proficiency of all weapon systems. These training programs are recommended as a method to attain and sustain weapon proficiency throughout the training year.

2–3. Training programs

Training standards are stated at the beginning of each program. The individual training strategy is given next, followed by the squad, crew and/or platoon training strategy. Proficiency is achieved

through the use of dry-fire exercises, blank fire exercises, subcaliber exercises, use of devices, and full caliber live-fire exercises. Ammunition requirements are discussed at the conclusion of each training program. The programs are developed on the assumption that training events will be evenly spaced throughout the training year. Resource availability (such as ranges) may allow a commander more live-fire opportunities of shorter duration. In this case, not all squads, crews, and platoons in the battalion will train at each opportunity.

2–4. Training strategies

The training strategies in this section are based on exercises in current field manuals (FM) and ARTEPs. The specifics of each exercise are not presented here; consult the appropriate manual. Qualification standards and training strategies for some weapon systems have been divided into two categories:

a. Category I applies to all Rangers assigned to the 75th Ranger Regiment, unless they are listed in Category II.

b. Category II applies to Rangers assigned to the Regiment or battalion headquarters, medical platoon, company headquarters section, food service section, support platoon, supply section and the Ranger Training Detachment.

Section II
Assigned Weapon Training Strategies

2–5. Pistol, 9-mm

a. Standard. All Rangers assigned a 9-mm pistol will qualify every six months. Qualification consists of firing the combat pistol qualification course in accordance with FM 23-35 and firing for record in mission oriented protective posture (MOPP) 4.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-2.

2–6. M16A2/M4A1

a. Standard. All Category I and II Rangers assigned an M16A2 or M4A1 will qualify every six months. Qualification consists of firing qualification to standard in accordance with FM 23-9, firing in MOPP 4 and night fire for record.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-3.

2–7. Shotgun, 12-gauge

a. Standards. All Rangers assigned a 12-gauge shotgun will qualify every six months.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-4.

2–8. M24 sniper rifle

a. Standard. All Rangers designated as snipers will qualify with their assigned M24 Sniper Rifle once per quarter. Qualification consists of firing in accordance with FM 23-10. Iron sights and scope will be zeroed monthly.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-5.

2–9. M203 grenade launcher

a. Standards. All Rangers assigned an M203 will qualify every six months. Qualification consists of firing table 8-2, FM 23-31.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-6.

2–10. M249 squad automatic weapon

a. Standard. All Rangers assigned a M249 squad automatic weapon (SAW) will qualify every six months. Qualification consists of firing the 10-meter record course and the 10-meter transition course in accordance with FM 23-14.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-7.

2–11. Hand grenade.

a. Standard. All Rangers will throw one live, fragmentation hand grenade annually and either negotiate a grenade practice exercise every six months in accordance with FM 23-30 or practice throwing a grenade in conjunction with squad or platoon external evaluations (EXEVAL), live-fire exercise (LFX) or field training exercise (FTX) every six months.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-8.

2–12. AT-4

a. Standard. Two Rangers per rifle/weapon squad will qualify with the AT-4 every six months. Qualification consists of firing the subcaliber ammunition (9-mm) in accordance with FM 23-25, Appendix D, Tables III and IV.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-9.

2–13. M240B machine gun

a. Standard. All M240B machine gunners and assistant gunners (AG) will qualify every six months. Qualification consists of the 10-meter record course, transition range course (FM 23-67) and firing at night for record.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-10.

2–14. M2 HB machine gun

a. Standard. All M2 machine gunners and AGs will qualify every six months. Qualification consists of 10-meter record course, transition record course (FM 23-65) and firing at night for record.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-11.

2–15. MK-19 grenade machine gun

a. Standard. All Ranger MK-19 gunners and assistant gunners will qualify every six months. Qualification consists of firing the range card course in accordance with FM 23-27 (table C-5) and firing at night.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-13.

2–16. Mortar, 60-mm

a. Standard. All squad leaders, gunners and assistant gunners will pass the mortar gunner's exam (FM 23-90) every six months and all mortar sections will receive a satisfactory rating in accordance with ARTEP standards every six months. Each crew/section/platoon, individually or as part of a larger unit, will conduct one LFX every two months.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-13.

2–17. Forward observer

a. Standard. All assigned Ranger forward observer (FO) Teams must adjust the three missions identified in table 2-14 in accordance with Regimental Training Circular (RTC) 350-1 every six months.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-14.

2–18. Pyrotechnics

Use table 2-15 for annual pyrotechnic requirements.

2–19. M18A1/A2 Claymore mine

a. Standard. All Rangers must emplace, arm, and disarm one inert Claymore Mine (FM 23-23) every six months. Additionally, each rifle/weapon squad will incorporate three live Claymore Mines in conjunction with an LFX.

b. Training strategy. Recommended training strategies and ammunition requirements are provided in table 2-16.

2–20. Mines

a. The annual ammunition requirements for demolition systems are given in table 2-17.

b. Antitank Mine Standard.

(1) One-hundred percent of the Ranger squad members must perform the individual mine warfare tasks every six months. Training will be accomplished with inert devices. The individual mine warfare tasks include the following:

- 051-192-1006 Install/Remove the M15 Antitank Mine
- 051-192-1007 Install/Remove the M19 Antitank Mine
- 051-192-1009 Install/Remove the M21 Antitank Mine
- 051-192-1014 Install/Remove US Antihandling Devices

(2) All Ranger squads/platoons must perform the unit mine warfare tasks every six months. Training will be accomplished with inert devices. The unit mine warfare tasks include the following:

- 5-3-0101 Install/Recover or Transfer a Hasty Protective Minefield
- 5-3-0106 Conduct Route Minesweep Operations
- 5-3-0108 Emplace a Nonstandard Pattern Minefield
- 5-3-0105 Clear a Vehicle lane through a Minefield

c. Demolition standard.

(1) Each Ranger rifle squad must have a basic demolition team that performs the basic demolition and explosive breaching charge tasks live in accordance with RTC 350-1 every six months.

(a) The following are the basic demolition tasks:

- Task 1: Construct and detonate a non-electric (initiation) demolition charge.
- Task 2: Construct and detonate an electric (initiation) demolition charge.
- Task 3: Construct and detonate a shock tube (initiation) demolition charge.
- Task 4: Construct an electric firing circuit (common series and leapfrog series) to detonate two or more demolition charges.
- Task 5: Construct and detonate explosives using detonating cord.
- Task 6: Construct and detonate a detonating cord line main system and ring main system.
- Task 7: Breach a wire obstacle with a Bangalore torpedo.
- Task 8: Prepare and detonate an expedient platter charge.
- Task 9: Prepare and detonate an expedient grape-shot charge.
- Task 10: Construct and detonate a field expedient Bangalore torpedo (Claymore, picket, or pole method).
- Task 11: Construct a nonelectric dual firing system.
- Task 12: Construct and detonate an earmuff charge.
- Task 13: Construct and detonate three or more M18A1 Claymore Mines simultaneously.
- Task 14: Construct and detonate a saddle charge.

(b) The following are the explosive breaching charge tasks:

- Task 1: Construct and detonate the Brashier breach.
- Task 2: Construct an AT&T charge.
- Task 3: Construct a flexible linear charge.
- Task 4: Construct a flexible linear window charge.
- Task 5: Construct a silhouette charge.
- Task 6: Construct a rubber strip charge.
- Task 7: Construct a general charge.
- Task 8: Construct a chain-link ladder charge.
- Task 9: Construct a doughnut charge.
- Task 10: Construct a wall-breach charge.
- Task 11: Construct a shooting hole charge.

(2) Each Ranger rifle platoon must have an advanced demolition team that performs the advanced demolition tasks, in accordance with RTC 350-1, every 12 months. The following are the advanced demolition tasks:

- Task 1: Using the standard formula for an untamped external charge, compute and detonate a TNT charge.
- Task 2: Emplace and detonate a 40-pound cratering charge electrically and nonelectrically using detonation cord and dual priming below ground.
- Task 3: Emplace two shaped charges; one 15-pound bore holing to insert a cratering charge, and one 40-pound as a command detonated antitank mine.
- Task 4: Compute a charge for a structural steel beam target and detonate the charge.
- Task 5: Install M147 time-delayed firing device (TDFD) on standard military explosives.
- Task 6: Construct and employ a fireball.
- Task 7: Prepare and detonate a linear shaped charge.
- Task 8: Prepare and detonate a field expedient shaped charge.

Table 2–1
Regimental Training Requirements

Task	Remarks
Familiarization	Required to familiarize Rangers on the capabilities of weapons and ammunition.
Zero/Field Fire Qualification	Regiment is required to qualify every six months to maintain readiness.
Night Fire/NBC Fire	Qualification includes those activities required for qualification set forth in the FM appropriate to the weapon system.
Squad/Platoon LFX	Each Ranger battalion is required to conduct an LFX every six weeks.
CALFEX	Each Ranger battalion participates in a minimum of two CALFEXs per year. CALFEXs are extensive live-fire exercises that integrate all weapon systems into the operation.
JOTC/JRTC/NTC	Each Ranger battalion participates in one JOTC, JRTC, or NTC rotation at least biennially.
Major Exercise	Each Ranger battalion participates in one major exercise annually (for example, Bright Star, Cobra Gold).

Table 2–1
Regimental Training Requirements—Continued

Task	Remarks
Joint Readiness Exercise (JRX)	JRXs involve one or more Ranger battalion and aviation assets from SOAR and 16th SOW. JRXs are conducted four times a year, with one battalion conducting two, and two battalions conducting one each.
Bilateral Training (BILAT)	This training is conducted at a smaller scale than a JRX. BILATs are used to enhance the special operations skills of both Rangers and the supporting air unit. BILATs are conducted eight times a year, with one battalion conducting four, and two battalions conducting two each.
Advance MOUT Training (AMT)	AMT is the Regiment's MOUT training program. Each Ranger battalion will participate in an intensive MOUT training period twice a year (includes a semi-annual "Train the Trainer" requirement). This training is conducted by each Rifle company.
Ranger Ready Force (RRF)	RRF-1 assumption occurs four times a year. One Ranger battalion will assume RRF-1 two times, while two Ranger battalions will assume RRF-1 one time each.
EDRE	The Regimental EDRE program requires at least one RRF-1 rifle company be evaluated per RRF-1 cycle.

Igniter, Time Blasting Fuze[5]	MN08	28	1	831
Holder, Cap Blasting and Shock Tube	ML45		1	300
Cap Blasting, Nonelectric, 30 ft (ea) Shock Tube	ML47	8	1	216
Cap Blasting, Nonelectric, 500 ft (ea) Shock Tube	MN02	8	1	216
Cap Blasting, Nonelectric, Delay 7.5 ft (ea)	MN06	8	1	216

Notes:
[1] Each squad will have four members for a basic demolition team. Each Battalion will have 27 basic demolition teams.
[2] Five sections of the Bangalore kit will be used for each iteration.
[3] C4 and TNT may be substituted for each other, on a pound-for-pound basis.
[4] Increased frequency to account for demolition team sustainment training conducted during LFXs as well as advanced MOUT training (AMT).
[5] Additional fuse ignitors (10 percent) are required for rehearsals and test burns.

Chapter 3
Special Forces—Active and Reserve Components

Section I
Training Programs

3–1. General
This chapter provides standards, training strategies and resource requirements for weapons to be used by Active Component (AC) and Reserve Component (RC) Special Forces units. The training programs provided are specifically designed for each weapon system within Special Forces units. Each program contains a strategy and standard that outlines the training resources and includes suggested frequencies of live fire, subcaliber and use of devices.

3–2. Objective
The objective is to assist the commanders in attaining and sustaining acceptable levels of weapons and tactical proficiency in support of Special Forces missions. The training programs provide a method to attain and sustain weapon proficiency throughout the training year.

3–3. Training programs
Special Forces units are divided into two categories for planning and resourcing. Category I consists of operational detachments (OD)A, (OD)B, Support Operational Team A (SOTA), Chemical Reconnaissance Detachments (CRD) and Tactical Air Control Party (TACP). Category II consists of Group Headquarters, Headquarters and Headquarters Company, Battalion support assets.

3–4. Training strategies
The resource strategies in this chapter are based on exercises in FMs, STPs, MTPs, and USASFC(A) Reg 350-1. All Category I personnel are required to participate in at least three (OD) LFXs annually (AC) or 36 months (RC). This chapter addresses the resourcing of the LFXs; however, the specifics of each LFX will not be addressed in this manual. For specific information, consult the appropriate training publications.

Section II
Assigned Weapon Training Strategies

3–5. TOW missile
a. Standard (Category 1). MOS 18B/C assigned to an ODA and ODB will familiarize and conduct instructional fire in accordance with FM 23-34. MOS 18B/C will conduct missile live-fire training within 12 months (AC) or 36 months (RC). Missile live-fire training is to be conducted at company level or higher to maximize resources.

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-1.

3–6. Dragon

a. Standard (Category I). MOS 18B/C assigned to an ODA and ODB will familiarize and conduct instructional fire in accordance with FM 23-14 within 12 months (AC) or 36 months (RC). MOS 18B/C will witness the firing and tracking of a live missile within 12 months (AC) or 36 months (RC). Missile live-fire training will be conducted at company level or higher to maximize resources.

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-2.

3–7. Recoilless rifles (RCRL), 106-mm

a. Standard (Category I). MOS 18B assigned to an ODA and ODB will conduct instructional fire on RCRL 106-mm within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training required.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-3.

3–8. AT-4

a. Standard (Category I). MOS 18B/C assigned to an ODA and ODB will conduct instructional fire within 12 months (AC) or 36 months (RC). Missile live-fire training will be conducted at company level, or higher, to maximize resources.

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-4.

3–9. LAW

a. Standard (Category I).

(1) MOS 18B/C assigned to an ODA and ODB will conduct instructional fire within 12 months (AC) or 36 months (RC).

(2) All ODA, ODB SOTA, SOTB, and CRD detachments will conduct instructional fire and participate in 3 LFXs within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-5.

3–10. Mortars 60-mm, 81-mm, 120-mm

a. Standard (Category I). All personnel assigned to an ODA and ODB will conduct instructional fire within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in tables 3-6, 3-7, 3-8.

3–11. M2 HB Machine Gun

a. Standard (Category I).

(1) MOS 18B assigned to an ODA and ODB will conduct instructional fire within 12 months (AC) or 36 months (RC).

(2) All assigned gunners and assistant gunners as part of a mounted ODA will qualify every 6 months (AC) in accordance with FM 23-65. All assigned gunners will conduct at least 3 LFXs (as part of a mounted ODA) within 12 months.

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-9.

3–12. M60 Machine Gun

a. Standard (Category I). All personnel will conduct instructional firing in accordance with FM 23-67 within 12 months (AC) or 36 months (RC).

b. Standard (Category II). All assigned personnel will conduct instructional fire in accordance with FM 23-67 within 12 months(AC) or 36 months(RC).

c. Training strategy. Recommended training strategies and ammunition resourcing are given table 3-10.

3–13. M249 Squad Automatic Weapon

a. Standard (Category I).

(1) MOS 18B/C assigned to an ODA or ODB will qualify in accordance with FM 23-14 within 6 months (AC) or 12 months (RC). Each ODA will conduct at least 3 LFXs within 12 months (AC) or 36 months (RC).

(2) All non-assigned personnel will conduct instructional firing within 12 months (AC) and (RC).

b. Standard (Category II).

(1) All assigned gunners and assistant gunners will qualify in accordance with FM 23-14 within 12 months (AC) and (RC)

(2) All non-assigned personnel will conduct instructional firing within 12 months (AC) and (RC).

c. Training strategy. Recommended training strategies and ammunition resourcing are given table 3-11.

3–14. M16A2/M4 rifle

a. Standard (Category I). All personnel assigned the M16A2 Rifle/M4 Carbine will qualify within 6 months (AC) and 12 months (RC) in accordance with FM 23-9. All personnel will conduct at least 3 LFXs within 12 months (AC) or 36 months (RC).

b. Standard (Category II). All personnel assigned the M16A2/M4 Carbine will qualify within 6 months (AC) and 12 months (RC), in accordance with FM 23-9.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-12.

3–15. M24 sniper rifle

a. Standard (Category I). All designated snipers will conduct sustainment training, familiarization fire and qualify in accordance with table 3-13.

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-13.

3–16. M203 grenade launcher

a. Standard (Category I).

(1) All assigned gunners will qualify within 6 months (AC) and 12 months (RC) in accordance with FM 23-3l. All assigned gunners will conduct at least 3 LFXs within 12 months (AC) or 36 months (RC).

(2) All non-assigned gunners will conduct instructional fire within 12 months (AC) or 36 months (RC) in accordance with FM 23-31.

b. Standard (Category II)

(1) All assigned gunners will qualify within 6 months (AC) and 12 months (RC) in accordance with FM 23-31.

(2) All non assigned gunners will conduct instructional fire within 12 months (AC) or 36 months (RC) in accordance with FM 23-31.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-14.

3–17. Pistols, 9-mm/.45 cal/.38 cal

a. Standard (Category I). All personnel assigned a weapon will qualify within 6 months (AC) and 12 months (RC) in accordance with FM 23-35.

b. Standard (Category II).

(1) All personnel assigned a weapon will qualify within 6 months (AC) and 12 months (RC) in accordance with FM 23-35.

(2) Non-assigned personnel will conduct instructional fire within 12 months (AC) or 36 months (RC).

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-15.

3–18. Hand grenade

a. Standard (Category I). All MOS 18 Series, SOTA, SOTB and CRD personnel will throw a live fragmentation hand grenade within 12 months (AC) and (RC). All operational detachments will conduct at least 3 LFXs within 12 months (AC) or 36 months (RC).

b. Standard (Category II). All personnel will train on the instructional practice course within 12 months (AC) and (RC).

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-16.

3–19. M18A1/A2 Claymore mine

a. Standard (Category I).

(1) All 18-series personnel assigned to an ODA or ODB will place and detonate one live M18A1/A2 mine within 12 months (AC) or 36 months (RC).

(2) All other personnel will arm and disarm one inert Claymore mine within 12 months (AC) and (RC).

b. Standard (Category II). All personnel will arm and disarm one inert Claymore mine within 12 months (AC) and (RC).

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-17 and 3-25.

3–20. MK 19

a. Standard (Category I).

(1) All personnel will conduct instructional fire within 12 months (AC) or 36 months (RC).

(2) All assigned gunners and assistant gunners will qualify every 6 months (AC); no requirement for (RC) in accordance with FM 23-27. All assigned gunners will conduct at least 3 LFXs as part of a mounted detachment within 12 months (AC); no requirement for (RC).

b. Standard (Category II). All assigned gunners and assistant gunners will qualify within 12 months (AC) or 36 months (RC) in accordance with FM 23-27.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-18.

Section III
Nonstandard Weapon Training Strategies

3–21. Pistols/revolvers

a. Standard (Category I). MOS 18-Series personnel will load, fire, reduce a stoppage, and clear the weapons listed in table 3-19 in accordance with STP 31-18-SM-TG within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategies and ammunition requirements are given in table 3-19.

d. Weapon Certification (Foreign). All foreign weapons must be certified for firing every 12 months. Ammunition required for certification are given in table 3-19.

3–22. Submachine guns

a. Standard (Category I). MOS 18 Series personnel will load, fire, reduce a stoppage, and clear the weapons listed in table 3-20 in accordance with STP 31-18-SM-TG within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategies and ammunition requirements are given in table 3-20.

d. Weapon certification (foreign). All foreign weapons must be certified for firing every 12 months. Ammunition required for certification are given in table 3-20.

3–23. Rifles

a. Standard (Category I). MOS 18-Series personnel will load, fire, reduce a stoppage, and clear the weapons listed in table 3-21 in accordance with STP 31-18-SM-TG within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategies and ammunition requirements are given in table 3-21.

d. Weapon certification (foreign). All foreign weapons must be certified for firing every 12 months. Ammunition required for certification are given in table 3-21.

3–24. Machine guns

a. Standard (Category I). MOS 18-series personnel will load, fire, reduce a stoppage, and clear the weapons listed in table 3-21 in accordance with STP 31-18-SM-TG within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategies and ammunition requirements are given in table 3-22.

d. Weapon certification (foreign). All foreign weapons must be certified for firing every 12 months. Ammunition required for certification are given in table 3-22.

3–25. Pyrotechnics

Pyrotechnics to be used during battalion training is in table 3-23. Annual resourcing requirements for RC units will be .5 x column value per each RC unit.

3–26. Combat training centers (CTC) rotation

CTC ammunition requirements for units are listed in table 3-24 and 3-24a.

3–27. Engineer weapon systems

a. General. This section provides training standards, strategies, and resource requirements to conduct training with demolition and mines. Personnel in an ODA are divided into the following groups:

(1) All ODA members.

(2) MOS 18C personnel in an ODA.

b. Training programs. Training strategies are established for each task to be accomplished by an ODA. The standards are supported by training strategies that, if followed, will enable the commander to attain and sustain the demolition proficiency of his soldiers. Resources are applied to the standards and strategies as written. The commander has the flexibility to modify both the training strategy and use of resources as long as the training standards are met.

c. Munitions. The quantities of munitions required annually is given in table 3-25, for one iteration of the task to be accomplished by personnel of the ODA are summarized in subparagraph *e*.

d. Programs for ODA members, Group I.

(1) *Training standards.* Training standards are given below. Recommended training strategies for all tasks are given in table 3-25.

(2) *Demolition Standard.*

(a) All ODA personnel will perform each task listed below and prime live demolition for live fire to FM 5-250 standards and within STP 31-18-SM-TG and STP 31-18C3/4-SM-TG standards within 12 months.

- 051-193-1002—Construct a Nonelectric Demolition Firing system.
- 051-193-1004—Construct an Electric Demolition firing system.
- 051-193-1009—Construct a Detonating Cord Firing System.
- 051-193-1011—Install a Dual Firing System.
- 051-193-3038—Install Booby Traps.
- 051-193-3050—Calculate and Designate Placement of Timber Cutting Charges.
- 051-193-3051—Calculate and Designate Placement of Steel Cutting Charges.
- 331-922-0502—Employ the M2A1 8-Second Delay Percussion Detonator.
- 331-922-0503—Employ the M2A1 15-Second Delay Percussion Detonator.
- 331-922-0504—Employ the M1 Delay Firing Device (Time Pencil).
- 331-922-0505—Employ Civilian Explosives.
- 051-193-2028—Neutralize Obstacles.
- 051-193-3052—Calculate and Designate Placement of Breaching Charges.
- 051-193-3053—Calculate Explosives and Designate Placement of Cratering Charges.
- 331-922-0009—Prepare and Employ a Demolition Ambush.
- 331-922-0010—Prepare and Employ Expedient Munitions.
- 331-922-0500—Employ M10 Universal Explosive Destructor.

- 331-922-0501—Employ M19 Explosive Destructor
- 331-922-0506—Construct and Employ Expedient Charges (shape, dust initiator, platter, ammonium nitrate satchel, cratering and grapeshot).

(3) *Antitank, antipersonnel mine standard.* All ODA personnel will perform each task listed below and witness the priming and detonating of a live mine in accordance with FM 20-32 standards and within STP 31-18C3/4-SM-TG within 12 months.

Note. Resources are given in table 3-25.

- 051-192-1002—Install/Remove the M16A1 Bounding Fragmentation Mine. (Korea only)
- 051-192-1026—Install/Remove the M2 series (M2A4) Bounding AP Mine
- 051-192-1004—Install/Remove the M25 Blast AP Mine
- 331-922-0507—Install/Remove the M3 Blast AP Mine.
- 051-192-1006—Install/Remove the M15 AT Mine.
- 051-192-1007—Install/Remove the M19 AT Mine.
- 051-192-1008—Install/Remove the M21 AT Mine.
- 051-192-1028—Install/Disarm and Package the M24 AT Mine.
- 051-192-2009—Install/Remove the M1 One-Gallon Chemical Mine with an Electric Detonating Assembly.
- 051-192-2010—Install/Remove the M23 AP Chemical Mine.

(4) *Minefields.* All ODA personnel will perform each task listed below and arm an inert minefield according to FM 20-32 standards and within STP 31-18C3/4-SM-TG standards within 12 months.

- 051-192-1014—Install/Remove US Antihandling Devices on AT Mines.
- 051-192-3030—Direct a Minefield Laying Party.
- 051-192-3032—Direct Installation /Removal of a Hasty Protective Minefield

3–28. Rocket propelled grenades

a. Standard (Category I). MOS 18B assigned to an ODA and ODB will conduct instructional fire on RPG 7 and 18 within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training required.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-26.

3–29. Close-quarters combat

a. Standard (Category I). All personnel assigned to a Company designated with a Theater-directed (CQC) mission will conduct sustainment training and qualify every quarter in accordance with table 3-27 and ST 31-20-6-1.

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategy and ammunition resources are given in table 3-27.

3–30. Recoilless rifles (RCRL), 84-mm

a. Standard (Category I). MOS 18B assigned to an ODA and ODB will conduct instructional fire on RCRL 84-mm within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training required.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-28.

3–31. Recoilless rifles, 90-mm

a. Standard (Category I). MOS 18B/C will conduct instructional fire on RCRL 90-mm within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training required.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-29.

3–32. Stinger

a. Standard (Category I).

(1) All 18B/C will conduct instructional training with the Stinger trainer launch simulator (STLS) within 12 months (AC) or 36 months (RC).

(2) MOS 18B will conduct missile live-fire training within 12 months (AC) or 36 months (RC). Missile live-fire training will be conducted at company level or higher.

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategies and ammunition requirements are in table 3-30.

3–33. Mortars, 107-mm

a. Standard (Category I). MOS 18B/C personnel assigned to an ODA and ODB will conduct instructional fire within 12 months (AC) or 36 months (RC).

b. Standard (Category II). No training requirement.

c. Training strategy. Recommended training strategy and ammunition resourcing are given in table 3-31.

[1] B645 is refurbishable using a B653 kit. Recommend 16 refurbishment kits for each B645 cartridge requested. Tool kit (M880/M766) is available in accordance with TM 9-1315-252-12&P.

Chapter 4
160th Special Operations Aviation Regiment (Airborne)—Active Component and the 1/245th

Section I
Training Programs

4–1. General
This chapter provides weapon standards, training strategies and training ammunition resource requirements for the 160th Special Operations Aviation Regiment (Airborne) and the 1/245th Aviation Battalion (SO) RC. The training programs are specifically designed for each weapon system within the regiment and the battalion. Each training event contains the standards and strategies, the ammunition requirement and the required frequency of fire.

4–2. Objective
The objective is to ensure training ammunition is available to maintain weapons proficiency.

4–3. Training programs
a. Training programs are developed for each weapon system. The training programs provide a method to attain and sustain weapon proficiency throughout the training year.

b. Standards are stated at the beginning of each program. These standards are based on training readiness requirements, unique training needs and objectives as specified by mission.

c. Dry-fire exercises, subcaliber exercises, use of devices and full caliber live-fire exercises are used to develop and maintain weapon proficiency.

d. Ammunition resources are based on the number of personnel required to become proficient and/or the number of weapon systems authorized.

e. All organic weapon systems are discussed in this chapter.

4–4. Training strategies
The training strategies in this chapter are based on exercises in current FMs, mission essential task lists (METL), and historical training data. The specifics of each exercise are not presented here.

Section II
160th Special Operations Aviation Regiment

4–5. Selection and training

a. Standards. All personnel arriving to the Regiment must qualify with the M16A2, 9-mm pistol and the MP5 SMG prior to assignment to one of the operational battalions.

b. Training strategy. All personnel will undergo initial training established in the selection and training program. While in this program, personnel will qualify and train in the different M16A2, 9-mm pistol and the MP5 SMG firing techniques as indicated in table 4-1. This strategy ensures all personnel are fully mission qualified prior to operational unit assignment and emphasizes weapon sustainment.

4–6. M16A2 rifle

a. Standards. All personnel assigned an M16A2 rifle will remain fully mission qualified with that weapon system once they have been assigned to a unit. Qualification consists of firing the record fire course (FM 23-9), firing in MOPP 4 protective clothing and firing at night for record within six months.

b. Training strategy. Recommended training strategies and ammunition resources are provided in table 4-2.

4–7. M9 combat pistol

a. Standards. All personnel assigned a 9-mm pistol will qualify within six months . Qualification consists of firing the combat pistol qualification course in accordance with FM 23-35.

b. Training strategy. Recommended training strategies and ammunition resources are provided in table 4-3.

4–8. MP-5 submachine gun

a. Standards. All personnel assigned an MP5 submachine gun will qualify within six months.

b. Training strategy. Recommended training strategies and ammunition resources are provided in table 4-4.

4–9. M2 HB machine gun

a. Standard. All assigned M2 machine gunners and AGs will qualify semiannually. Qualification consists of 10-meter record course, transition range course, and night firing for record.

b. Training strategy. Recommended training strategies and ammunition resources are provided in table 4-5.

4–10. M60 machine gun

a. Standard. All assigned M60 machine gunners and AGs will qualify within six months. Qualification consists of 10-meter record course, transition range course (FM 23-67), and night firing for record.

b. Training strategy. Recommended training strategies and ammunition resources are provided in table 4-6.

4–11. M249 squad automatic weapon

a. Standard. All personnel assigned a SAW will qualify within six months. Qualification consists of firing 10-meter record course, 10-meter transition course (in accordance with FM 23-14).

b. Training strategy. Recommended training strategies and ammunition resources are provided in table 4-7.

4–12. M203 grenade launcher

a. Standard. All personnel assigned an M203 will qualify within six months. Qualification consists of firing table 8-2 (FM 23-31).

b. Training strategy. Recommended training strategies and ammunition resources are provided in table 4-8.

4–13. Light antitank weapon

a. Standard. Two personnel per company will qualify by successfully engaging 5 of 10 targets with the M73 subcaliber rocket in accordance with FM 23-25, Appendix C, Tables I, II, and III within 6 months. Ninety percent of each company will observe a 66-mm HEAT M72 LAW fired within 12 months.

b. Training strategy. Recommended training strategies and ammunition resources are given in table 4-9.

4–14. Hand grenade

a. Standard.

(1) Ninety percent of all Company personnel will successfully negotiate any grenade practice exercise, as stated in FM 23-30 within 6 months.

(2) Ninety percent of all Company members will observe a live fragmentation hand grenade within 12 months.

b. Training strategy. Recommended training strategy and ammunition requirements are given in table 4-10.

4–15. M18A1/A2 Claymore mine

a. Standard. Ninety percent of assigned company personnel will emplace, arm and disarm an inert Claymore mine within 12 months. Ninety percent of assigned company personnel will observe a live Claymore mine detonation (FM 23-23) within 12 months.

b. Training strategy. Recommended training strategy and ammunition requirements are given in table 4-11.

4–16. MH-60 (DAP) aerial gunnery training and support

a. General.

(1) All designated DAP aviators will fully qualify before becoming DAP basic mission qualified (BMQ).

(2) Upon completion of Selection and Training, designation as an MH-60 DAP aviator, and successful aerial gunnery qualification, all DAP aviators will conduct sustainment training monthly. Requirements are given in table 4-12.

b. Mission Support.

(1) MH-60 aircraft provide frequent close air and suppressive fire assets for training in support of other Special Operations Forces.

(2) To minimize total ammunition requirements, units will make all attempts to maximize aviator sustainment training in conjunction with external training support.

(3) At no time will an aviator who is not fully mission qualified (FMQ) perform fire and maneuver in conjunction with external training support.

c. AGM-114 Hellfire requirements. Each aircrew (total 10) will fire one AGM-114 per year. Hellfire missiles will be used in conjunction with customer support. Using Hellfire missiles in this manner allows the aircrews to familiarize with the weapon system and allows the customers to train on coordination procedures, communication, designation and target effects associated with Hellfire missiles.

4–17. AH-6 aerial gunnery training and support

a. General.

(1) All basic mission trained (BMT) aviators will fully qualify before becoming basic mission qualified (BMQ). Specific requirements are included in table 4-13.

(2) Upon completion of Selection and Training and successful aerial gunnery qualification, all aviators will conduct sustainment training monthly.

b. Mission Support.

(1) AH-6 aircraft frequently provide close air and suppressive fire assets in support of Special Operations Forces.

(2) To minimize total ammunition requirements, units will make every attempt to maximize aviator sustainment training in conjunction with external support.

(3) At no time will an aviator who is not fully mission qualified (FMQ) perform fire and maneuver in conjunction with external support.

4–18. Crewchief door gunnery with the M134 minigun

a. Standard. All crewchiefs will fully qualify with the M134 minigun. Requirements are given in table 4-14.

b. Training strategy. Crewchiefs will fire from the door gunnery position in various aerial approaches until proficiency is obtained. Crewchief door gunnery training is conducted on a monthly basis.

4–19. Pyrotechnics and miscellaneous ammunition items

a. Standards. Simulate the greatest possible degree of realism during the conduct of joint live-fire exercises for ground troops.

b. Training strategy. Pyrotechnics provide greater realism for individual ground troops during joint readiness training exercises (JRTs), combined arms live fire exercises (CALFEXs), capabilities exercises (CAPEXs) and other joint exercises. Table 4-15 is based on historical data from previous exercises.

c. Cutters (M500).

(1) *Standards.* Applicable personnel will be trained and proficient in the execution of heavy equipment airborne operations in conduct of a forward area refueling and rearming point (FARRP).

(2) *Training strategy.* Training must be realistic. Execution of actual heavy equipment airborne operations must be conducted. All equipment must be made readily available including the charge reefing cutters used for cutting parachute lines from the equipment. The following computation will be used for figuring the amount of cutters required during the training year: 4 cutters/drop × 8 drops/mission × 2 missions/month × 12 months = 768.

Section III
1/245th Aviation Battalion

4–20. M16A2 rifle

a. Standards. Ninety percent of the personnel assigned an M16A1/A2 rifle will qualify within 12 months. Qualification consists of firing the record fire course (FM 23-9), and firing at night for record.

b. Training strategy. Recommended training strategies and ammunition resources are given in table 4-16

4–21. Pistols

a. Standards. All personnel assigned to the Battalion must familiarize with the pistol and its uses under different conditions. All soldiers assigned a pistol will qualify within 12 months. Qualification consists of firing the combat pistol qualification course in accordance with FM 23-35.

b. Training strategy. Recommended training strategies and ammunition resources are given in table 4-17.

4–22. M2 HB machine gun (.50 cal)

a. Standard. Ninety percent of the assigned M2 HB machine gunners and assistant gunners will qualify within 12 months. Qualification consists of firing the record course (FM 23-65) and firing at night for record.

b. Training strategy. Recommended training strategies and ammunition resources are given in table 4-18.

4–23. M60 machine gun

a. Standard. All M60 Machine Gunners and AGs will qualify within 12 months. Qualification consists of 10-meter record course, transition range course (FM 23-67), firing in MOPP 4 for record and night firing for record.

b. Training strategy. Recommended training strategies and ammunition resources are provided in table 4-19.

4–24. M249 squad automatic weapon

a. Standard. All personnel assigned a SAW will qualify within 12 months. Qualification consists of firing the 10-meter record course and the 10-meter transition course (in accordance with FM 23-14).

b. Training strategy. Recommended training strategies and ammunition resources are provided in table 4-20.

4–25. M203 grenade launcher

a. Standard. All personnel will qualify with the M203 GL within 12 months. For qualification standards see FM 23-31, table 8-2.

b. Training strategy. Recommended training strategies and ammunition resources are provided in table 4-21.

4–26. Light antitank weapon

a. Standard. Two personnel per company will qualify by successfully engaging 5 of 10 targets with the M73 subcaliber rocket in accordance with FM 23-25, Appendix C, Tables I, II and III within six months. Ninety percent of each company will observe a 66-mm HEAT M72 LAW fired within 12 months.

b. Training strategy. Recommended training strategies and ammunition resources are given in table 4-22.

4–27. Hand grenade

a. Standard.

(1) Ninety percent of all Company personnel will successfully negotiate any grenade practice exercise, as stated in FM 23-30 within 12 months.

(2) Ninety percent of all Company personnel will observe one live fragmentation hand grenade within 12 months.

b. Training strategy. Recommended training strategy and ammunition requirements are given in table 4-23.

4–28. M18A1/A2 Claymore mine

a. Standard. Ninety percent of assigned company personnel will emplace, arm, and disarm one inert Claymore mine within 12 months. Ninety percent of assigned Company personnel will observe a live Claymore mine detonation (FM 23-23) within 12 months.

b. Training strategy. Recommended training strategy and ammunition requirements are given in table 4-24.

4–29. MH-60D door gunnery

a. Standard. Ninety percent of the assigned M60D gunners must qualify within 24 months. Additionally, each gunner must have received sustainment training within 24 months. For qualification requirements, see FM 1-140, Tables V through VII.

b. Training strategy. Recommended training strategies and resources are given in table 4-25.

4–30. Crew chief door gunnery with the M134 minigun

a. Standard. All crewchiefs will fully qualify with the M134 minigun within 12 months.

b. Training strategy. Crewchiefs will fire from the door gunnery position in various aerial approaches until proficiency is obtained.

4–31. Pyrotechnics and miscellaneous ammunition

a. Standards. Simulate the greatest possible degree of realism during the conduct of joint live-fire exercises for ground troops.

b. Training strategy. Pyrotechnics will be used to provide greater realism for individual ground troops during quarterly training exercises, CALFEXs, CAPEXs and other joint exercises. Table 4-27 is based on historical data from previous exercises.

c. Cutters (M500).

(1) *Standards.* Applicable personnel will be trained and proficient in the execution of heavy equipment airborne operations in conduct of an FAARP.

(2) *Training strategy.* Training must be realistic. Execution of actual heavy equipment airborne operations must be conducted. This means all equipment must be made readily available including the charge reefing cutters used for cutting parachute lines from the equipment. The following computation will be used for figuring the amount of cutters required during the training year: 4 cutters/drop x 8 drops/mission x 2 missions/quarter x 4 quarters = 256.

Sustainment	12	6	10	36	4	720	6000

Notes:
Step 1. To determine total number of rounds authorized by table 4-12, multiply the number of anticipated S&T pilots X 3 and then by specific type rocket in each column. Upon completion of gunnery qualification, pilots will conduct sustainment training for the remaining nine months of the year.
Step 2. Multiply the number of pilots currently on-hand or authorized (whichever is greater) X 12 (frequency) and then by the specific type rocket in each column.
Step 3. Add totals from Step 1 and 2 for annual internal training ammunition requirement.

Chapter 5
Civil Affairs/Psychological Operations

Section I
Training Programs

5–1. General

This chapter provides standards, training strategies, and resource requirements for weapons assigned to, and utilized by, civil affairs and psychological operations units, for both Active Component (AC) and Reserve Component (RC). The training programs provided are specifically designed for each weapon system. Each program contains a strategy and standard that outlines the training resources and includes suggested frequencies of live fire, subcaliber and use of devices.

5–2. Objective

The objective is to assist commanders in attaining and sustaining acceptable levels of weapons and tactical proficiency in support of

civil affairs/psychological operations missions. The training programs provide a method for the attainment and sustainment of weapon proficiency throughout the training year.

5–3. Training strategies

The training strategies in this chapter are based on exercises in current FMs and ARTEPs. The specifics of each exercise will not be addressed in this pamphlet. For further information concerning these exercises consult the appropriate training document.

Section II
Weapon Strategies

5–4. M16A1/A2

a. Standard. All personnel assigned an M16A1/A2 rifle will qualify in accordance with FM 23-9 within 12 months. Qualification consists of firing the record firing course, NBC record fire, and night record fire.

b. Training Strategy. Recommended training strategy and ammunition requirements are given in table 5-1.

5–5. Pistol, .45 cal and 9-mm

a. Standard. All personnel assigned a .45-cal/9-mm pistol will qualify in accordance with FM 23-35 within 12 months.

b. Training strategy. Recommended training strategies and ammunition requirements are given in table 5-2.

5–6. M60 machine gun

a. Standard. All assigned M60 gunners will qualify in accordance with FM 23-67 within 12 months.

b. Training strategy. Recommended training strategy and ammunition requirements are given in table 5-3.

5–7. M203 grenade launcher

a. Standard. All personnel assigned an M203 Grenade Launcher will qualify in accordance with FM 23-31 within 12 months.

b. Training strategy. Recommended training strategies and ammunition requirements are given in table 5-4.

5–8. Pyrotechnics and miscellaneous ammunition items

a. Standards. Simulate the greatest possible degree of realism during the conduct of training exercises for units.

b. Training strategy. Pyrotechnics are used to provide greater realism for units during training exercises. Table 5-5 is based on historical data from previous exercises.

Chapter 6
Mobilization

Section I
Training Programs

6–1. General

a. This chapter provides standards, training ammunition requirements, and recommended training strategies for Reserve Component Special Operations and other forces during mobilization. Each Strategy outlines the training sequence, including frequencies for live fire and simulator usage.

b. The training strategies in this chapter are based on current doctrine, gunnery FMs, ARTEPs, and applicable MTPs. The appropriate manual will be consulted on the specifics of each activity.

c. Under the certification/validation program, it is not necessary for every element of an organization to qualify. To certify/validate elements, post-mobilization activities focus on mission preparation. To assist resource managers developing requirements for post mobilization train-up activities for Special Operations elements several assumptions must be made:

(1) Up to one third of the force will not be certified/validated.

(2) Up to fifty percent of the force requiring certification/validation will not need to verify qualification, however, they will need LFX training activities.

(3) Up to one sixth of the force will not have completed initial entry training.

(4) For non-certified/validated elements, a CTC rotation will be necessary.

d. As an example: in an entire Special Forces Group, we count on a battalion-sized element requiring some phase of certification/validation. In that battalion, one B team and six A teams may require weapon qualification ranges and ammunition. Weapons to be fired equates to 68 M16s, 12 M203s (including the M16 portion) and 8 pistols. The remaining elements of the battalion will require ammunition to support four fire tactical exercises (using blank ammunition), four LFXs and a CTC rotation for two B teams and 12 A teams. These are approximation methods and should not be taken as absolutes.

6–2. Objectives

Weapons training tasks in priority are—

a. Individual weapon proficiency.

b. Crew served weapon proficiency.

c. Common weapon proficiency.

d. Tactical training with blanks and simulators.

e. Live-fire tactical training.

f. Non-standard weapon proficiency.

6–3. Training strategies

a. Individual soldiers train on individual weapons.

b. Assigned crews/detachments assigned the mission to teach crew-served weapon skills will train on crew served weapons.

c. Special Forces Detachments are required to participate in a series of tactical exercises including four LFXs to certify/validate light infantry skills.

Section II
Weapons Strategies

6–4. Antiarmor weapons

Ammunition allocations and training priorities for antiarmor weapons (TOW, 106-mm RCLR, Dragon, AT-4, LAW) are at tables 6-1 through 6-5.

6–5. Mortars

Ammunition allocations and training priorities for mortars (60-mm, 81-mm and 120-mm) are at table 6-6 through 6-8.

6–6. Machine guns

Ammunition allocations and training priorities for machine guns (M2 HB, M60 and M249 SAW) are at table 6-9 through 6-11.

6–7. Rifles

Ammunition allocations for rifles (M16A1/A2, M21 sniper rifle and M203 GL) are at table 6-12 through 6-14.

6–8. Pistols

Ammunition allocations for pistols (M1911A1 and 9-mm) are at table 6-15.

6–9. Hand grenades

Ammunition allocations for hand grenades are at table 6-16.

6–10. Claymore mine

Ammunition allocations for Claymore mines are at table 6-17.

6–11. Engineer weapons

a. This section provides training standards, strategies and ammunition resources for Special Forces units using Engineer munitions upon mobilization. ODA personnel are divided into the following two groups.

(1) *Group I.* All ODA personnel.

(2) *Group II.* The 18B and 18C in the detachment to be trained.

b. Training programs. Training strategies are established for each task to be accomplished by the ODA. The standards are supported by training strategies. Resources are applied to the standards and strategies as written.

c. Munitions. The quantities of munitions required are annotated

in table 6-18, with one iteration of the task to be accomplished by personnel of the ODA summarized in table 6-19.

(1) *Training standards.* Training standards for each task are given below.

(2) *Demolition standard.*

(a) Ninety percent of Group I personnel will perform each task listed below and prime demolition for live fire to FM 5-250 standards.

- 051-193-1002 Construct a Nonelectric Demolition Firing System.
- 051-193-1004 Construct an Electric Demolition Firing System.
- 051-193-1009 Construct a Detonating Cord Firing System.
- 051-193-1011 Install Dual Firing Systems.
- 051-192-3038 Install Booby Traps.
- 051-193-3050 Calculate and Designate Placement of Timber-cutting Charges.
- 051-193-3051 Calculate and Designate Placement of Steel-cutting Charges.
- 331-922-0502 Employ the M2A1 8-Second Delay Percussion Detonator.
- 331-922-0503 Employ the M1A2 15-Second Delay Percussion Detonator.
- 331-922-0504 Employ the M1 Delay Firing Device (Time Pencil).
- 331-922-0505 Employ Civilian Explosives.

(b) Ninety percent of Group II personnel will perform each task listed below and prime demolition for live fire according to FM 5-250 standards and within STP 31-18C3/4-SM-TG standards.

- 051-193-2028 Neutralize Obstacles.
- 051-193-3052 Calculate and Designate Placement of Breaching Charges.
- 051-193-3053 Calculate Explosives and Designate Placement of Cratering Charges.
- 331-922-0009 Prepare and Employ a Demolition Ambush.
- 331-922-0010 Prepare and Employ Expedient Munitions.
- 331-922-0500 Employ the M10 Universal Explosive Destructor.
- 331-922-0501 Employ the M19 Explosive Destructor.
- 331-922-0506 Construct and Employ Expedient Charges (shape, dust initiator, platter, ammonium nitrate satchel, cratering and grapeshot).

(3) *Antitank, Antipersonnel Mine Standard.* Ninety percent of ODA personnel will perform each task listed below and prime live mines for live detonation according to FM 20-32 standards.

Note. Each ODA is allocated one each live M15 AT, M19 AT, M21 AT and M24 AT mine. Each ODA member will arm and disarm each inert mine to standards for M2, M3, M1, M23, M16A1, M15, M19, M21 and M24.

- 051-192-1002 Install/Remove the M16A1 Bounding Fragmentation AP Mine. (Korea only)
- 051-192-1026 Install/Remove the M2 series (M2A4) Bounding AP Mine.
- 051-192-1004 Install/Remove the M25 Blast AP Mine.
- 331-922-0507 Install/Remove the M3 Blast AP Mine.
- 051-192-1006 Install/Remove the M15 AT Mine.
- 051-192-1007 Install/Remove the M19 AT Mine.
- 051-192-1008 Install/Remove the M21 AT Mine.
- 051-192-1028 Install/Disarm and Package the M24 AT Mine.
- 051-192-2009 Install/Remove the M1 One Gallon Chemical Mine with an Electric Detonating Assembly.
- 051-192-2010 Install/Remove the M23 AP Chemical Mine.

(4) *Minefields.* Ninety percent of Group II personnel will perform each task listed below and arm an inert minefield according to FM 20-32 standards and within STP 31-18C3/4-SM-TG standards within 12 months.

- 051-192-1014 Install/Remove US Antihandling Devices on AT Mines.
- 051-192-3030 Direct a Minefield Laying Party.
- 051-192-3032 Direct Installation/Removal of a Hasty Protective Minefield.

M591	Dynamite, Mil, M1	480
M627	Firing Device, Pressure, M5	39
M670	Fuze, Time Blasting, M700	10200
M757	Charge Assembly, Demolition, M183	6
M766	Igniter, Time Fuze	2160
M842	Squib, Electric, M1	8
ML03	Firing Device, M142	39
M448	Detonator, 8-second Delay, M2A1	36
M450	Detonator, 15-second Delay, M1A2	36
M619	Firing Device, Delay (time pencil), M1	36
M623	Firing Device, Delay	36
M630	Firing Device, M1	38
M626	Firing Device, M1A1	38
M629	Firing Device, M3	38

Notes:
[1] If C-4 is not available, substitute TNT on a pound-for-pound basis.

Table 6–19
Ammunition Requirement and Training Strategy for Demolition

Event (Individual Tasks)	Task Number	Freq Live/Inert
Install a Dual Firing System	051-193-1011	3 / 1
Calculate and Designate Placement of Timber Cutting Charges (Inert)	051-193-3050	3 / 1
Calculate and Designate Placement of Steel Cutting Charges	051-193-3051	3 / 1
Install Booby Traps	051-193-3038	3 / 1
Install/Remove the M16 AP Mine (Korea only)	051-192-1002	1 / 1
Install/Remove the M15 AT Mine	051-192-1006	1 / 1
Install/Remove the M19 AT Mine	051-192-1007	1 / 1
Install/Remove the M21 AT Mine	051-192-1008	1 / 1
Install/Disarm/Package the M24 AT Mine	051-192-1028	1 / 1
Install/Remove the M1 1-Gallon Chemical Mine w/an Electric Detonating Assembly	051-192-2009	0 / 1
Install/Remove the M23 AP Chemical Mine	051-192-2010	0 / 1
Construct an Electric Demo Firing System	051-193-1004	3 / 1
Construct		3 / 1
Construct a Detonating Cord Firing System	051-193-1009	3 / 1
Employ Civilian Explosives	331-922-0505	3 / 1
Employ the M2A1 Delay Percussion Detonator (8 sec)	331-922-0502	3 / 0
Employ the M1A2 Delay Percussion Detonator (15 sec)	331-922-0503	3 / 0
Employ the M1 Delay Firing Device	331-922-0504	3 / 0
Install/Remove the M2 AP Mine	051-192-1026	0 / 1
Install/Remove the M25 AP Mine	051-192-1004	0 / 1
Install/Remove the M3 AP Mine	331-922-0507	0 / 1
Event (Team (ODA) Tasks		
Neutralize Obstacles	051-193-2028	1 / 0
Calculate and Designate Placement of Breaching Charge	051-193-3052	1 / 0
Calculate Explosive and Designate Placement of Cratering Charge	051-193-3053	1 / 0
Prepare and Employ a Demolition Ambush	331-922-0009	1 / 0
Prepare and Employ Expedient Munitions	331-922-0010	1 / 0
Employ the M10 Universal Explosive Detonator	331-922-0500	1 / 0
Employ the M19 Explosive Detonator	331-922-0501	1 / 0
Construct and Employ Expedient Charges	331-922-0506	1 / 0
Install/Remove AT Mine Antihandling Device	051-192-1014	1 / 0
Direct a Minefield Laying Party	051-192-3030	0 / 1
Direct Install/Remove of a Hasty Protective Minefield	051-192-3032	0 / 1

category

Cbt Arms
Combat Arms

CG
Commanding General

CMF
career management field

coax
coaxial

CONC
concussion

CRD
chemical reconnaissance detachment

CQB
close-quarters battle

CQC
close-quarters combat

CRT
combat readiness training

CS
close support/combat support

CSA
Chief of Staff of the Army

CSS
combat service support

CTC
combat training center

CTT
common task test

DA
Department of the Army

DAMO-TRS
Deputy Chief of Staff for Operations and Plans (Training)

DAP
defensive armored penetration

DCSOPS
Deputy Chief of Staff for Operations and Plans

det
detachment

dist
distance

DODIC
Department of Defense Identification Code

ea
each

EDRE
emergency deployment readiness exercise

EFP
explosive formed projectile

EXEVAL
external evaluation

FARRP
forward area rearm and refuel point

FDC
fire direction center

FFAR
folding fin aerial rocket

FIST
fire support team

flech
flechette

flr
flair

flsh
flash

FMQ
fully mission capable

FM
field manual

FO
forward observer
